---

Here is a list of all groups submitting more than 1,000 comments, with the number of comments they submitted.

Some of the comments are individual letters, some are petitions, and some are as the example I left with the initial sample of groups.

We are still going through the smaller ones and uploading the numbers to [regs.gov](#). It will be later Friday or Monday before we have the totals and for and against breakdown. As you can readily see from the names on the list, all of the attachment comments are against the review.
